CAREER OBJECTIVE

Aspiring Software Engineer proficient in a diverse range of technical skills including C, Java, Python, HTML, CSS, JavaScript, React.js, Node.js, MySQL, MongoDB, and Socket.IO, Linux. Experienced in developing scalable web applications and real-time systems, with a strong foundation in software development methodologies and project management.

EDUCATION

Bachelor of Technology in Computers Science and Engineering
Indian Institute of Information Technology
Board of Intermediate Education
Tirumala Junior College

March 2022 – August 2026
CGPA: 7.3
June 2020 – May 2022
CGPA: 10

TECHNICAL SKILLS

- **Programming Languages:** C, Java, Python, C++
- **Web Technologies:** HTML, CSS, JavaScript, React.js, Node.js
- **Database Technologies:** MySQL, MongoDB
- **Real-time Web Applications:** Socket.IO

WORK EXPERIENCE

EMERTXE-Future Ready Institute
Internet Of Things Intern

Jan 2025-Jun 2025

- Developed and implemented IoT solutions using SDLC (Software Development Life Cycle) methodology for optimized project planning and execution.
- Utilized technologies for microcontroller programming, focusing on efficient memory management and low-latency operations.
- Documented code and system designs to ensure knowledge transfer and maintainability of projects.
- Conducted unit testing and debugging on embedded systems to ensure reliable operation of IoT devices.

PROJECTS

Real Time Chat Application– **January 2024 – March 2024**

- Engineered and deployed a scalable real-time chat platform using Node.js, React, and Socket.IO, achieving uptime and handling concurrent users per server instance, enhancing user engagement.
- Integrated MongoDB and SQL databases to manage user profiles and chat history, optimizing data retrieval times by and ensuring seamless data synchronization across platforms.

Hazardous Scream Detection System using CNN – **January 2025 – March 2025**

- Developed and deployed a CNN-based hazardous scream detection system capable of distinguishing distress screams in real-time, even in noisy environments
- Integrated Twilio API for automated SMS alerts and Google Geolocation API for accurate location sharing, enabling faster emergency response.

CERTIFICATIONS

- Certified in Python for Machine Learning through Great Learning.
- Achieved completion in the Google Cloud Study Jam program for Cloud Computing Foundation and Generative AI, presented by Google.
- Completed Accenture's Data Analytics simulation, analysing datasets for content trends, and presented insights via PowerPoint and video
